Why ?

650 000 pedestrians
are killed each years.

Road trafic safety

Several millions of
deaths each year.

Home safety

It's high
time to
act !

What is Victor app ?

« Victor » is a video gaming application for Windows Phone 7 destined to educate children about the dangers that surround them.

Existing solutions

In these games, you help children to be aware of the dangers of their home.

The drawbacks

There is **no smartphone** application.

There is **no centralization**.

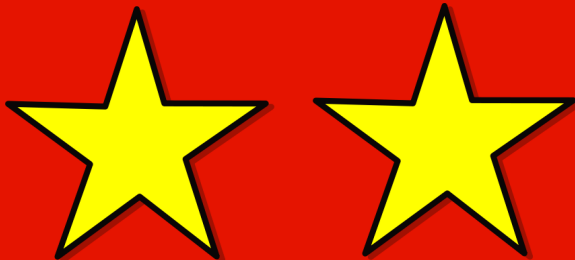

All these games **need** an **Internet** connection.

There is **nothing** for the **parents**.

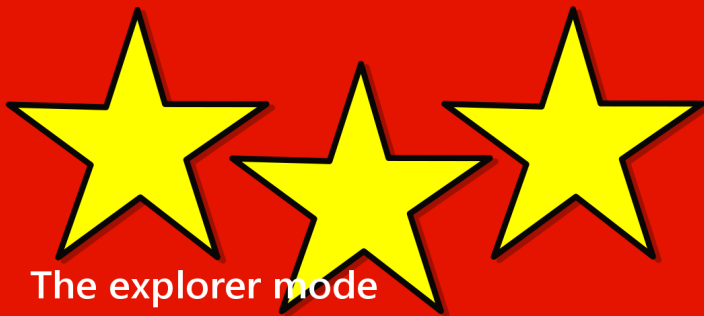

How to play ?

The disguise mode

The explorer mode

The adventure mode

The adventure mode

Several levels for several subjects
(home safety, road traffic safety,
holiday, health, environment, etc.).

Each level has its own scenario.

A level is a sequence of videos and
questions which can be read or listen.

The adventure mode

At the **end of a level**, the player **wins** a **costume** for the disguise mode and a **certificate** he can **share** on several **social networks**.

The disguise mode

Disguise Victor with the costumes you win and buy exclusive items in our shop !

The disguise mode

← head →

← shirt →

← trousers →

← accessory →

buy

share

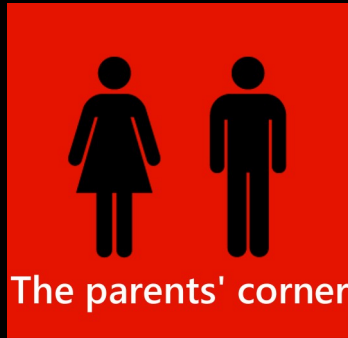

The explorer mode

A real **augmented reality** mode.

The child **explores** his home with the **camera** of the Windows Phone and Victor **detects** the **dangers**.

The parents' corner

All **the answers** of the child's session **are saved**.

Parents can **consult** the **answers** of their children to **increase** the **prevention**.

To resume

A real centralization
of several types of
dangers.

There is no internet
connection needed.

A real
monitoring
for the
parents.
